TECH RIDER

WHAT WE BRING:

Band member	Instrument	Equipment
Andrei State	Vocals	- Wireless microphone (Shure BLX4) - Wired microphone (Shure SM58)
Andrei „Bojo” Bojoga	Guitar	- 7 string guitar (Solar) - Guitar processor (Neural DSP Quad Cortex) - Wireless unit (NUX-5CR)
Alex Popescu	Guitar	- 6 string guitar (Solar) - Guitar processor (Line6 POD HD500X) - Wireless unit (Line6 Relay G30)
Robert „Nemo” Berezovschi	Bass	- 5 string bass (ESP) - Wireless unit - Darkglass Alpha/Omega
Cosmin „Gogoasa” Rotariu	Drums	- Cymbals - Snare drum - Drum pedal - Drum chair
	Sampler	- Cymatic LP16
Misc.	IEM Rig	- Mixer (Behringer XR18) - Wireless IEM unit (Phenyx Pro PTM-33-4B) - Signal splitter (Midas DN4816-O)

WHAT WE NEED:

MONITORING

We run our IEM monitoring through our own mixer. We send a copy of our signals to the PA through a splitter (post gain). If the drum kit is miced at the location, we will need a monitor sum of the drums back to our drummer.

DRUM KIT

The drummer needs a drum kit that comes with all basic elements (for example, kick, toms), cymbal stands and the required microphones to mic everything. Additionally, he will need a table/stand to place his IEM mixer and sampler.

POWER

Each band member will need at least 2 power outlets to plug in everything (wireless units, pedalboards, etc.).
